Topic	Activities
LAB1	1. Demonstrating Arithmetic Operators 2. Check Given Number is Even or Odd 3. Giving Grade to Student (5 Subjects) 4. Factorial of a Number 5. Fibonacci Sequence 6. Sum of Two Numbers 7. Maximum of Three Numbers 8. Check Given Number is Prime or Not 9. Finding GCD of Two Numbers 10. Finding Positive or Negative Number 11. Find Simple Interest
FDS1	12. Find Compound Interest 13. Check Armstrong Number 14. Find Area of a Circle 15. Find Sum of Digits of Given Number 16. Check the Given Number is Palindrome 17. Sum of Squares of First n Natural Numbers
FDS 2	18. Multiplication Table 19. Program to Count Down from a Given Number 20. Prime Numbers Between 1 and 20 21. find roots of quadratic equation 22. Write a program to read Employee data from the keyboard and print that data. 23. Write a program to check whether the given number is in between 1 and 100? 24. Write a program to take a single digit number from the key board and print it's value in English word? 25. Python Program to calculate overtime pay of 10 employees. Overtime is paid at the rate of Rs.12.00 per hour for every hour worked above 40 hours. Assume that employees do not work for fractional part of an hr. 26. . A library charges a fine for every book returned late. For first five days the fine is 50 paise, for 6 to 10 days fine is one rupee, and above 10 days fine is five rupees. If you return the book after 30 days your membership will be cancelled. Wr... 27. Two numbers are entered through keyboard, Write a Python program to find the value of one number raised to the power another. 28. . Factorial Using Recursion 29. Linear Search (Iterative) and Complexity 30. Bubble Sort and Complexity
Lab2 and FDS3	31. Find Largest Element from given 10 read from user elements in a list 32. Find Second Largest element in list read 10 elements from user 33. Remove Duplicates from list read 10 elements from user 34. Reverse List by reading from user 35. Find Sum & Average of 10 elements list read from user list 36. Find Even & Odd Lists 37. Find Common Elements Between Two Lists read two lists 38. Rotate List read from user 39. Find Maximum and Minimum in tuple** 40. Remove Duplicates from List** 41. Find Common Elements in two sets read from user 42. Count Frequency of Characters in string 43. Word Frequency Counter in a sentence 44. Count Vowels and Consonants in a string 45. Count Words in Sentence**

Topic	Activities
lab 3 and FDS 4	46.Find Sum of Array Elements 47.Find Maximum and Minimum in Array 48.Search an Element in Array 49.Reverse an Array 50.Read and Print a Matrix 51.Read 2 matrices and find Matrix Addition 52.read 3*3 matrices and find their difference 53.Read 2* 2 matrices and find their multiplication 54.Read 2*3 matrix and find its transpose 55.read matrix and find sum of daigonal elements 56.Read 3*3 matiix and check whether it is identity matrix or not
lab 4	57.Read 12 elements in a list and display them 58.Read 12 elements in a list and convert to tuple and display 59.Read 12 elements in to a set and display 60.Read 12 dictionary element pairs and display the same 61.Read 12 elements in to an array and display 62.Read a matrix and display 63.write linear search program to find given element in a given array 64.Search given key in given array using binary search 65.Sort the given list using bubble sort 66.Sort the given list using selection sort 67.Sort the given list using insertion sort
FDS 5	68.Function to print full pyramid pattern 69.Perfect number : Check if the sum of the proper divisors of the number is equal to the variable. 70.Check a given number is Strong number or not 71.An Armstrong number is a number that is equal to the sum of its own digits each raised to the power of the number of digits 72A neon number is a number where the sum of digits of square of the number is equal to the number 73.write a function to Bank Loan Eligibility Checker 74.Student Grade Calculator 75.Electricity Bill Calculator 76.Write a module and access it in python file.
FDS 6	77.Check Leap Year 78.Count Digits in a Number 79.Find Second Largest Number 80.Remove Duplicate Elements in a list1 = [1,2,3,2,4,5,3] 81.Check Anagram Strings read two strings and check 82.Find Missing Number in List given arr = [1,2,3,5] , n=5 83.Pattern Program 84.Find Duplicate Elements in List list1 = [10, 20, 30, 20, 40, 10] 85.Email Validation 86.Login Authentication System ---username = "admin" password = "1234" 87.Find Bank Balance Program after withdraw some amt -- --current balance = 10000 88.Password Strength Checker by 8 letters
MATLAB	89.matlab basic programs 90.matlab arrays example 91.matrices using matlab 92.matlab - linear search 93.matlab-binary search 94.matlab-bubble sort 95.matlab - selection sort 96.matlab - insertion sort 97.matlab - read a number and print -ve,+ve or zero 98.matlab -demonstrate loops with examples

Topic	Activities
unit 4	99.create a dataframe 100.Draw bar chart for categories = ['A', 'B', 'C'] values = [10, 20, 15] 101.Draw line chart in matlab for x = 1:10; y = [2, 3, 5, 7, 11, 13, 17, 19, 23, 29]; 102. Draw scatter plot in python for data {'X': [1, 2, 3, 4, 5], 'Y': [5, 10, 15, 20, 25]} 103.Draw Histogram in python by taking random values between 1-1000 104.Draw Boxplot in python for data = [7, 8, 9, 10, 15, 20, 21, 22, 30] 105.Draw Pie chart in python for labels = ['Apple', 'Banana', 'Cherry'] sizes = [30, 40, 30] 106.Draw pair plot by taking random values in three columns and use python 107.Draw simple Line chart in python for x = [1, 2, 3, 4, 5] y = [10, 20, 25, 30, 50] 108.Draw simple Line chart in matlab for x = 0:0.1:10; % Define x values from 0 to 10 y = sin(x); % Compute sine values
